

# EXPERIENCE MAKES THE DIFFERENCE

## CRACKER BARREL

In 2009 we completed multiple scopes of work for Cracker Barrel Country Store's locations throughout the Southeast. HCC has performed everything from restroom accessory repair to FRP in the back of a house, to a full scale exterior re-siding and paint. HCC has served Cracker Barrel with a high level of service and attention to detail. Communication was the key as coordination was required with local store, regional, and national management.

## LOWE'S LIFE CYCLE

Over the past several years, we have worked closely with Lowe's and their Life Cycle painting program. Through direct coordination with vendors, inspectors, and Lowe's personnel, HCC has completed the interior and exterior full repaints of over 100 locations throughout the Southeast. This year, we look to expand that footprint into the Midwest and Northeast, continuing to grow our relationship with Lowe's.

## HOME DEPOT REFRESH

In Home Depot's refresh program, we painted interiors and exteriors of over 100 locations in the Southeast, adding curb appeal and increasing customer approval of those locations. These projects required scheduling and coordination of manpower and equipment to ensure the store's customers did not feel any impact of our presence there.
