

# R.E.a.D.

RELIABLE EXPERIENCED DILIGENT

Summer 2022 Edition

## School is Out... Harrison Contracting Company is In!

HCC is buzzing with excitement to be back at Savannah College of Art and Design (SCAD) this summer! With over thirty crew members on site, we began work at the beginning of June refreshing The Hive dormitories, which consists of (8) four-story residence halls across the campus. Through our flexible approach and the dedication of our crews, we were able to complete the job in less than three weeks to accommodate the move-in date for new and returning students. We're grateful to partner with SCAD to deliver the quality and efficiency they expect. We refresh many schools and colleges during the summer and winter breaks to help prepare for the next semester. **We're more than just your painter, we're your partner!**

### TEAM PLAYER SPOTLIGHT

*Billy Poole*

We'd like to recognize Billy for his positive attitude, always putting in his best effort to complete quality work, and providing excellent customer service for our clients. Billy has been a Foreman at HCC for three years and is responsible for the completion of paint related maintenance jobs in our Facility Maintenance division. In his free time, Billy enjoys spending time with his wife and family, especially his adorable granddaughter, as well as cheering on the Alabama Crimson Tide football team!

**Billy, thank you for your years of dedication to Harrison Contracting Company.**

## HCC PRIDE

**Harrison Contracting Company continues expanding our reach in Self-Storage!**

In past years, we've completed many self-storage projects ranging from roll-up door repaints, full building exterior repaints, and new construction self-storage projects. We now have a dedicated team to focus on expanding our reach specifically in the self-storage industry. We have streamlined our process to be able to complete our work with minimal disruption to daily business. We're excited to continue our growth in the self-storage segment!

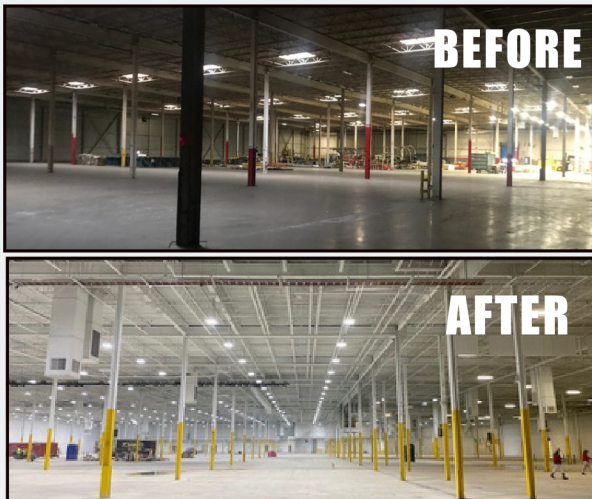

# Recap on Repainting

**National Accounts:** This division has been hard at work this summer! With over 1,400 jobs across the US already completed in 2022, we'd like to recognize our National Accounts team, both Project Managers and Superintendents, for their hard work and dedication. The attention to detail and logistics, in addition to constant communication with our clients, is essential to building strong partner relationships.

**Direct to Owner (DTO):** Our DTO division recently completed work for Ariens, a commercial equipment manufacturing company, in Fayetteville, TN. Our dedicated crews worked on the interior and exterior of the building, painting over 560,000 total square feet in less than ten weeks. We're proud of our teams for working so hard to complete this project in an efficient and timely manner.

# Facility Maintenance

Our Facility Maintenance division secured additional contracts with Truist Bank, and we're now handling maintenance at Macy's! We're grateful for the opportunity to develop a partnership with these clients and for the ability to handle any reactive maintenance needs that may occur. Additionally, we're very excited to welcome two new team members, Project Manager Kim Carter, and Project Assistant Kendal Cantrell!

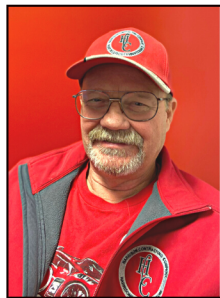

# New Construction News

HCC earned 1st place honors in the 2022 AGC Build Georgia Awards program for our work at Colony Square, a mixed-use development in Atlanta, GA. We worked closely with the owners and Hoar Construction to transform Colony Square into a vibrant commercial, retail, residential and urban environment, attracting various types of businesses and cultures. We're proud to be a part of the AGC organization, and we're honored to receive this award.

# Tommy's Tricks of the Trade

Tommy Haymon knows a thing or two when it comes to painting tips and tricks. His father was a painter for the union, and Tommy joined him in 1976. With over 20 years of painting already under his belt, Tommy began working at HCC in August of 1997. He's been a dedicated team member and is now a mentor to employees by sharing the knowledge he's obtained over his decades of experience.

**Tommy's Trick:** "The best time to paint metal is early in the morning or late in the afternoon when the weather is a little cooler. This will help the paint to dry evenly, avoiding flashing during the drying process."

# Industry Trends

## Why 'Working From Home' Doesn't Work for Every Industry

Imagine a world where everyone works from home and you stop by McDonald's to get a burger – no Big Mac for you. The same concept applies to the commercial painting industry. With fewer than 6% of Americans working from home in 2019, the number of WFH jobs in the US has more than tripled in comparison to remote positions available pre-pandemic, with much of the push coming from employees themselves. However, it's important to remember that burgers can't be cooked and buildings can't be painted through a Zoom call.

Although there are some industries where a company can go totally remote and still be viable, there are still so many in need of hands-on, in-person employees. With the abundance of remote positions available today, HCC has so much respect and appreciation for both our office personnel and our field crews who not only choose to come in every day, but give 100% effort in their work. They truly embody the Rely on RED culture by showcasing their **Reliability, Experience, and Diligence** every single day.

## Our Team

HCC attended the 2022 ConnexFM National Conference in April, allowing us to stay up to date on trends in the Facilities industry, as well as interact and build relationships with potential clients!

HCC's Director of Facility Maintenance, Sharon Milton, participated in the annual Connex charity foundation event, assisting local women's shelters in the area.

We also sponsored the closing night event which offered extensive networking opportunities, and featured an exciting performance by Vanilla Ice!

The annual ConnexFM conference is a wonderful way not only to connect with others in the Facilities industry, but for Harrison Contracting to gain opportunity to discuss and offer our Facility Maintenance and Commercial Painting Services to others!

## On The Track with HCC

Ashton Harrison and co-driver Tom Long continue progressing in the 2022 Lamborghini Super Trofeo series with 6 podiums in the first three races of the season, including a 1st place win at Laguna Seca! Ashton and Tom are currently leading in point standings.

Additionally, Ashton and partner Mario Farnbacher placed 1st in class and 2nd overall in the NO. 93 HCC Acura at NOLA Motorsports Park in May as part of the Fanatec GT World Challenge America circuit.

## Did You Know...

We have so many paint colors to choose from thanks to Sir Isaac Newton himself, who created the color wheel all the way back in the 17th century! According to the history books, Newton "took the bar of colors created by the passage of light through a prism and transformed it into a segmented circle, where the size of each segment differed according to his calculations of its wavelength and of its corresponding width in the spectrum." resulting in the color wheel used today!

## Savvy Safety

At Harrison Contracting, we are dedicated to instilling the importance and value of job site safety!

We continuously work to ensure that our Superintendents, Foremen, and other crew members are well educated on equipment safety. We periodically host Equipment Training courses to ensure that our crews get hands-on education on how to safely operate and handle heavy machinery used on the job like boom and scissor lifts.

Keeping our crews, clients, and their customers safe is one of our highest priorities!
